

We welcome you to our Arboretum and hope that you enjoy our many interesting trees most of which are to be found in the woodland. We have endeavoured to label those of special interest, they are listed below with both their Latin and more familiar names.

As you walk around we would ask that you please respect the trees some of which are very old and some are very young. All are precious to us and we would like you to share in our enjoyment of them.

If you have any questions about them do please ask a member of staff or a volunteer.

Rupert and Catherine Russell.
